INDEX TO VOLUME II.

JANUARY TO JUNE,

1900.

ACETYLENE exhibits at the Paris Exhibition, 484
— Gas Supply Works in Operation, 93
— —, New Method of Generating, 14
— Purification of, New German methods, 213
Aeronautics
Aerial Navigation, (Ed), 10
Alleged Navigable Air-Ship, An, 89
AFRICA,
— South, American Machinery for, 231
— — Elandslaagte as a Coal-mining centre, 88
— — Imports from the British Empire in 1898., 3
— — Irrigation in, 81
— — Naval 4·7 guns in, during the war, 77
— — New Bridge over the Tugela, 197, 205
— — Recent Military Equipment for, 71
— — Smart delivery of Railway and other Rolling-stock for, by a British firm, 204
— — Vickers-Maxim 37 mm. guns sent to, 244
— — War, The, in, and the Empire's Trade, 230
— — War Road Locomotives for, 323
— West (*see* Angola, Consular Homily, Gold Coast, *and* Ivory Coast)
— — Railway Engineering in, and Bridgebuilding, 81
Agriculture, Basic Slag as a Fertilising Agent, 91
— — Electricity in the Service of, (Ed), 601
Agricultural Implements and Machinery,
— Machinery for Germany, (Ed), 600
— — Oil Engines for Irrigation in Palestine, 670, and in Syria, 671
— — Sugar Beet Extractors, prizes offered for by the German Sugar Industry, 670
— — Well-drilling Machinery and Pumps for Irrigation required in Syria, 670-1
— Use of Basic Slag, 91
— Work, Electricity for, 82, 601
Air, Compressed, for Traction, 81
— Heated, Applications of, 353
— Liquid, 235
— — The Industrial Future of, 91
— Liquefied in Industrial Practice, 338
— as a Lubricant, 672
— Ship, An Alleged Navigable, 89
Air-Compressors, *see* Pneumatic Tools
ALASKA, Gold-mining at Cape Nome, 676
Alcohol, the Synthetic Production of, 212
Allan Line ss. *Tunisian*, 651
Alloys for Brass-Founders, 333
— of Iron and Nickel, 206
— New, Some Properties of, 88
Aluminium Long Distance Electrical Conductor, installation of, U.S.A., 82
— for Steel-Making at Pittsburg, 81
— *versus* Copper for Electrical purposes, 236
— Uses of, in India, 572
— Wire for Electric work in U.S.A., 209
Amalgamation, An, of Iron-works Companies, 94
AMERICA (*see also* Alaska, Baltimore, Boston, Brazil, California, Chicago, McKinley Tariff, Mexico, Nazareth, New Orleans, New York, Nicaragua, Paraguay, Peru, Pittsburg, San Francisco)
— Alleged Navigable Air-Ship Building in, 89
— — New Illuminating Gas discovered in, 212
— Aluminium Wire for Electrical work, tests of, 209
— Armament difficulties in connection with Russian cruiser *Variag*, building in, 447
AMERICA, Baldwin Locomotives on British and French Railways, 212
— British Iron Exports to, 89
— "Brown System," The, in, 364
— Calcium Carbide, Continuous Process for Making, Discovered in, 212
— Cost of Armourplate used in, 446
— Economy of Heating Feed-water for Locomotives affirmed in, 452
— Efforts to Utilise Atmospheric Electricity in, 209
— Electric Rail Welding in, 83
— — Railway plant from, for London, 244
— Electrical Process of Annealing Armour Plates, in, 448
— Failure of Compressed-Air Traction in New York, 81
— Goss Straight-Line Octuple Printing Press, 194
— Hand *versus* Machine Labour in, 88
— *Holland* Submarine Torpedo Boat, 115, success of, 586
— Installation of Long Distance Aluminium Electrical Conductor in, 82
— New Types of Radial Drilling Machinery in, 334
— Pacific Steamship Lines, The, (Ed), 598
— Piston Rod Burnishing Roller in, 202
— Proposed Ministry of Commerce and Industry in, (Ed), 599
— Self-Contained Wheel and Motor for Propelling Vehicles, in, 334
— Shipbuilding of, in 1899, 210
— Trades Unions at their Game in the U.S., (Ed), 600
— Utilisation of Blast Furnace Gases in, 675
— — of Gases from Coke Ovens in, 81
— Wireless Telegraphy, Developments of in, 208
American Agricultural Machinery for Germany, 600
— and British Shipbuilding, 113
— Competition, 589
— Competitors, British Supporters of, 672-3
— Depôt for Machine Tools in London, 364
— Eight-wheel Locomotives, 452
— Electric plant for Nottingham tramways, 672-3
— Exhibits at the Paris Exhibition, Ultimate destination of, 124
— Firms establishing themselves in Great Britain, 338-364
— Gas-Driven Well Pump, 204
— Iron and Steel Industries, 675
— Locomotives, (*see* eight-wheel, *supra*)
— — imported for study, into Bavaria 677
— — on British railways, 212
— — daily output of, 205
— — success of, 451
— Machinery for South Africa, 231
— Manufacturers (of Electrical appliances) and the Glasgow Corporation, 82
— Manufactures for India, 680
— Mechanical Stokers for Marine Purposes, 336
— rapid and English slow Filters, compared for Russian use, 446
— Seaton Loom, The, 451
— View of Gas Engines, An, 93
— Well-drilling Machinery and Pumps for Syria, 670
Amos, Ewart C., Pneumatic Tools and Appliances, (Part II), 41, 168, 293, 399, 522, 641.
Angles or Wedgepieces, An Easy Method of Planing, 566
Angola, West Africa, Consular Reports from, 86
Annealing Armour Plates, Electric Process of, 449

Another New Power (Sun Furnace), 447
Antwerp, Port of, Proposed Extensive Improvements in the Scheldt Waterway, 661
Appliances, Modern, in Gas Manufacture, F. W. and G. E. Stevenson, 33, 159, 282, 389, 511 ; *erratum*, 680
Arbitration in Labour Disputes, G. Howell, 28
Arc Lamps, Twin-Carbon, 335
Armament Difficulties in America, 447
Armour Plate Production, relative cost of in Great Britain, France, and U.S.A., 446
— — *versus* Projectiles (Ed.), 239
— — Plates, Electrical Process of Annealing, 449
— — — as Protection against Torpedoes, 679
Armoured Wagons, 71
Artificial Cork (Phellosene), 90
— Cotton from Fir-shavings, Germany, 90
— Fuel, Utilisation of Peat for, Ontario, 87, 92
— India-rubber, 242
Asahi, Japanese Battleship, 648
Asbestos, Discovery of, in Ceylon, 88
Asia Minor, Turkish Railway Concession in, 84
Association of Motor-car Builders, initiation of, 14
Atlantic Cargo Steamer, type of (abstract of Hunter's paper on), 477
Atmospheric Electricity, efforts to Utilise, 209
AUSTRALIA, *see* Coolgardie, *and* New South Wales
AUSTRIA, *see* Vienna
Automatic Feed by a String for a Planer Job, 80
— Lubricator, 324
— Machinery and the Labour Problem, *see* Eighteen Hundred and Ninety-nine : a Summary
— Railway Couplings Bill, 244
— — a New, 549
— Typewriter, 94
Automobiles in War, 206
Automotors and Electrical Machinery required in Sweden, 336

BACTERIA as Destroyers of Masonry, 90
Bacterial Treatment of Sewage, Dr. S. Rideal, 15, 134
Backwardness in Electrical Power Supply in Great Britain (Ed.), 483
Badly-wanted Invention, A, 89
Balanced Expansion Joint, 338
Baldwin Locomotives on British and French Railways, 212
Balloon, The, as a War Machine, H. L. Swinburne, 265
Baltimore and Ohio Railway, Steel Railway Carriages on, 479
Basic Slag as a Fertilising Agent, 91
— Steel Production in Germany, 572
Battleships. *See* Naval and Marine Engineering *and* Shipbuilding
BAVARIA, Electricity in the Service of Agriculture in, 82, (Ed.), 601
— Foreign Railway Products Imported for Study into, 677
Beam-Engine Cylinder Joint, Re-making a Large, 443
Bedsteads, Iron and Brass, Opening for Manufacturers of in Canada, 204
Behrend-Zimmerman Process for fully utilising Fuel-heat in Steam-engines, 671
Belgian Electrically-operated Dredge for use in the Volga, 83
BELGIUM (*see* Antwerp), Utilisation of Blast Furnace Gases in, 675
Belleville *versus* Scotch Boilers, Test of, 330
Belt, a Quarter-Twist, Driving a Planer with, 665
Belting, Some Considerations, 572
Belts, The Largest Made, 213
Benches, *see* Saw Guards and Benches
Bending Brass or Copper Pipes, A Simple Device for, 567
Bequerel Rays, the, the Source of Energy for, 679
Berlin, Electric Cabs in, 210
— Metropolitan Railway, Electricity as a Motive Power on the, 569
— Naphtha-Power Flexible-Shaft Pleasure Craft in, 81
— Oriental Commercial Museum established in, 680
Biles, Prof., resumé of paper by, on Large Cargo Steamers, 477
Birmingham, A Hint to, on openings in Canada for a manufactory of Iron and Brass Bedsteads, 204
— Argus Newspaper, the Goss Straight-Line Octuple Printing Press adopted by, 194
Black, A, Brilliant or Dead, to produce on Brasswork, 666
Blast Furnace Gases, Utilisation of, 674-5
— — Slag, as a Fertilising Agent, 91
— — — Utilisation of, 92
Board of Trade Journal, remarks on, 233
— — — — Tardy information afforded by, concerning Tenders, 338
— — — — Report Cited on the Mineral Production of the United Kingdom for 1898., 91
Bobbin Lever for Gassing Frame, 337
Boiler Registration and Inspection Bill (Ed.), 359
— Shop Kink, A, 79
Boilers, (*see* Water-tube Boilers)
— High-Pressure, (Ed.), 120
— Marine, Belleville and Scotch, Test of off Gibraltar, 237
— — of the *Mohegan*, 242
Boring Machine, *see* Drilling and Boring Machine
Boston, U.S.A., City Traffic of, 598
Brass Bedsteads, opening for manufactories of, in Canada, 204
— Brass or Copper Pipes, A Simple Device for Bending, 567
Brass-founders, Alloys for, 333
Brass-work, To Produce a Brilliant or Dead Black on, 666
BRAZIL, Railway Material for, 677
Breech-loading Howitzers, 74
Bridges (*see* Great Central Railway *and* Kew Bridge)
— Bridge Building, British, 205
— Hampden Bridge, over the Kangaroo River, New South Wales, 69
— New Bridge over the Tugela, a Record for a British Firm, 197, 205
Projects for Construction of Bridges in Portugal, 670
Brief Retrospect, A, (of FEILDEN'S MAGAZINE), 110
Brierley, Silent Fans, 448
— System of Railway Signalling, 435
British (*see also* English)
— and American Shipbuilding Industry, 113
— Bridge Building, 205
— Colonial Trade Reports, should they be Published ? 232
— Columbia, a suggested Source of Platinum, &c., 207
— Commercial Characteristics, Some, 470
— Cotton Trade, Growth of, 90
— Eastern Steamship Lines purchased by Germany, 211
— Engineering Students, invitations to, from abroad, 124
— Fire-engines in Russia, 87
— Firm, A Record for, the New Bridge over the Tugela, 197, 205
— — — Smart Delivery of Railway and other Rolling Stock by, for South Africa, 204
— and Foreign Shipbuilding in 1899, summarised,, 210
— Iron Exports to the U.S., 89
— Locomotives in use in Sweden, Excellence of, 677
— Navy, Engineers in, (Ed.), 481
— — The, and the Government, 350
— — Protection against Torpedoes in, by (moveable) Armour Plates, 680
— Patent Laws (openings for improving), (Ed.), 478
— Railways, Baldwin Locomotives on, 212
— Steam-Coal, Exportation of, 357
— Steamship Service, Suggested, to the Gulf of Mexico, 86
— Supporters of American Competition (Nottingham Municipality), 672-3
— Textile Manufactures, 678
— — Products in China, 84
— Thomson-Houston Co., Works about to be established at Rugby, 338
— Traction Engine, The (in South Africa), (Ed.), 118
— Trade, Canadian Tariffs and, 680
— — Openings for, in Formosa, 87
— — — — New, for, in Spain, 92
— — in Rome, 86
— — in West Africa, *see* Consular Homily
— Woollen Goods in Palestine, 678
British-made Valve, A., 68
Brown and Co., Manchester, engineering specialities of, 547
"Brown System," the, in America, 364
Buffer Stops, Hydraulic, 422
Building, The, of a Great Railway, the Great Central Extension to London, (Southern Division), 49, 176, 302 (Metropolitan Division), 409, 532
Burnishing Roller for Piston Rods, 202
Bye-Products of Gas, Proposed Utilisation of by Glasgow Corporation, 94

CABLE-LAYING by Locomotive, 93
√Cableways and the re-building of Kew Bridge, 321
Cabs, Electric, in Berlin, 210
Calcium Carbide, Continuous Process for Making, discovered in the U.S., 212
— — √Cost of, manufacture of, by Steam, 14
— — in the manufacture of Alcohol, 212
— — √A New Use for, 570
Caledonian Railway, New Style of Family Saloons on, 550
California, Pneumatic Gold-digging Machine in, 447
CANADA, *see also* Ontario
Canadian Lead Industry, The, and the McKinley Tariff, 90
Canadian Tariffs and British Trade, 680
Electric Current Generated at Niagra, sale of, 364, 674
√Large Belts made in, 213
New Railway Construction in, 84
Opening for a manufactory of Iron and Brass Bedsteads in, 204
Prohibition of Export of Pulp-woods from, 364
Canal, the Nicaragua, 244
√Canal Locks, Pneumatic (Ed.), 597
Candle Power of Gas, Economy in Reducing, 573
Cape Nome, Alaska, Gold-mining at, 676
Carbonic Acid, *see* Lime Carbonic Acid
Carbons, Graphitised Electrolytic, 449
√Carburetted Water Gas, S. Cutler, Jnr., 377
Cardiff, Proposed Municipal Coal-mining at, 446
√*Cardium*. s.s., using Liquid Fuel, 473
Cargo Steamers, Large, abstract of Prof. Biles' Paper on, 477
Carlsruhe, Electrical Time Service in, 209
Catalogues (*see* Reviews of Books and Catalogues), 89, 466
Clark, as an Electrical Standard, 210
Cells, Dry Secondary, for Electrical Purposes, 673
Celluloid, a Substitute for, 212
Cement, New, for Roofing, 213
— Works, A Modern at Nazareth, U.S.A., 204
Centering Cylinders for Tracing and Turning, 201
Central Heat and Power Stations, 116
√Centrifugal Pump, A Large, Electrically-driven, Switzerland, 674
Certificates of Origin, Abolition in France of Consular Fee for *visas* of, 124
Ceylon, Discovery of Asbestos and Plumbago in, 88
Chatillon-Commentry Coal Co., France, 208
Chemical Industries (*see* Acetylene, &c.)
√Calcium Carbide, A New Use for, 570
Coal, Spontaneous Combustion of, 570
Continuous Process for Making Calcium Carbide, 212
Partinium, 571
Sulphuric Acid without Lead Chambers, 570
Substitute for Celluloid, 212
Synthetic Production of Alcohol, 212
Tungsten, 570
Violet Scent, 570
Chicago, Continuous Process for Making Calcium Carbide discovered in, 212
CHINA, British Textile Products in, 84
Gold-mining in, 676
Nettle-fibre from, manufactured in Germany, 85
Pekin Railway Syndicate, The, and Shansi, 84
Chlorine and Sodium, New Electrolytic Process for obtaining direct from Salt, 448
Chucks, Lathe, and Substitutes for them, 91
Cities, Great, Traffic of, (Ed.), 598
Civil and Mechanical Engineering, (*see also* Locomotive, Mechanical Engineering, Railways, Workshop Practice, &c., &c.)
Agricultural Machinery for Germany, 600
Aluminium for Steelmaking, 81
American Rapid and English Slow Filters, 446
√ — Locomotives, daily output, 205
√Armament Difficulties in America, 447
Armour Plate, Production of, 446
Automobiles in War, 206
Belting—Some Considerations, 572
Bridge, A Remarkable, 206
Bridge Building Projects in Portugal, 670
√British Bridge Building, 205
Coke Ovens and their Waste Products, 81
Diesel Oil Engines, 447
Engineering in West Africa, 81
Engineers and Machine Tools, 205
√Failure of Compressed Air Traction, 81
√Flexible Driving Shafts, 81

Civil and Mechanical Engineering—*continued*.
√Gas-driven Well Pump, 201
√Hampden Bridge over the Kangaroo river, New South Wales, 69
High Speed Gas Engine Test, 205
Hint, A, to Birmingham, 204
√Increasing Weight of Locomotive Engines, 447
Irrigation in South Africa, 81
Lowrie's Power Excavator, 334
Modern Cement Works, A, 204
Motor Fire Engines, 206
Municipalism, The Spread of, 446
√New Bridge over the Tugela. A Record for a British Firm, 196, 205
√New Type of Radial Drilling Machine, 334
Nile River Works, Progress of, 12, 446
√Novel form of Steam Engine, 205
√Pneumatic Canal Locks, 597
Pneumatic Gold-digging Machine, 447
Projects for Contruction of Bridges in Portugal, 670
Proposed extensive improvements in the Scheldt Waterway, Port of Antwerp, 661
√Self-contained Wheel and Motor for Propelling Vehicles, 334
√Smart Engineering Feat, A, 204
Some Engineering Specialties (Brown's), 546
Steam Turbine, A, 2,000 h.p., 335
Steel Balls, Manufacture of, 446
Thomson's "Sun-furnace," (Another New Power), 447
Waterworks Projects in Madeira, 670
√*Clam* ss., using Liquid Fuel, 472
Clark Cell, The, as an Electrical Standard, 210
"Class Journalism," FEILDEN'S MAGAZINE and, (Ed), 358
Coal Company, The Hulam, Formation of, 208
— Export Trade of Great Britain, 1899., 677
— in Japan, 94
— Market, The, 236
— Spontaneous Combustion of, 570
— Steam, British Exportation of, 357
— Supplies of Great Britain, 471, 484
Coal-Cutting Machine, The Davis, 207
Coal-mining Centre, Elandslaagte as a, 88
— — in France, The Chatillon-Commentry Company, 208
— — Municipal, proposed, at Cardiff, 446
Coaling Warships under Steam, 86
Coke Ovens and their Waste Products, Utilisation of, U.S.A., 81
√Coles, Sherard Cowper-, Electro Galvanising, 603
Cologne, Proposed Exhibit of English and American Agricultural Machinery at, 600
Colonial Trade, French, Ten Years of, 231
— — Reports, British, Should they be Published? 232
Colour, The, of Gems, 207
— Photography, Researches in, 236
Combined Refuse Destructors and Power Plants, (Ed), 120
Commerce and Industry, Proposed Ministry of, in the U.S., (Ed), 599
Commercial Characteristics, Some British, 470
— Museum (Oriental), at Berlin, 680
— University, A, in Germany, (Ed), 361
√Compound and Four-Cylinder Locomotives in England and France, C. Rous-Marten, 365, 485
Compressed-Air Traction, Failure of, in New York, 81
Concentric Turning Rest, A., 668
Consolidated Engineering Co., Ltd., how formed, 94
Consular fee for visa of Certificates of Origin abolished in France, 124
— Homily, A., 86
Continuous Process for Making Calcium Carbide, 212
√Coolgardie Goldfields Water-Scheme, The, 555
Cop Dyeing Machine, New, 450
Copper, Aluminium as a substitute for, 236
√ — in Steel, Influence of, 675
√ — Pipes, *see* Brass or Copper Pipes
Cork, Artificial, (Phellosene), 90
√Corliss Gear, Turner-Pegg Positive, 191
√Corrosion of Screw Shafts (Ed), 601
Cost of Armour Plate Production in Great Britain, France, and U.S.A., 446
√ — of Steam-raising in Water-tube Boilers, 652
Cotton, Artificial, from Fir-shavings, 90
— Raw, New South Wales as a Supplier of, 85
— Trade, British, Growth of, 90
Coupling, A New Automatic, 549
Couplings, Automatic, Railway Bill, 244

Cowper-Coles, Sherard, *see* Coles, Sherard Cowper-
Crane, Improved Steam Locomotive, 430
Cruisers, Third Class, see *Pegasus*
Cunard Twin-Screw Steamer *Ivernia*, 477, 651
Curlew, H.M.S., Experiments on board, with Liquid Fuel, 473
Cutler, Samuel, junr., Carburetted Water Gas, 377
Cylinder-joint of large Beam Engine, Re-making a, 443
Cylinders, Centering for Tracing and Turning, 201

DAVIS Coal-cutting Machine, 207
Depreciation of Machinery, Prof., R. H. Smith, 270
Development of the Rotary Engine, (Ed.), 12
— of the Steam Turbine, (Ed.), 242
Diesel Oil Engine, 447
Disposal of Municipal Street Refuse, (Ed.), 240
Dock Foundations, The Hennebique System for, 67
Drainage of New Orleans : New Employment of Electrical Plant, 83
Dredge, Belgian, Electrically-operated, for use in the Volga, 83
— New Hydraulic, (Lindon-Bates), 318, 661
Dredger, New Twin-Screw Hopper for Osaka, 427
Drilling, (*see also* Well-drilling)
— Machine Attachment, A Handy, 669
— — Jig, A Handy, 667
— Machinery, Radial, New (American) Types of, 334
— and Boring Machine Electrically driven, 656
Drills, Long-Twist, 564
— Pneumatic, 531, 641
Driving a Planer with a Quarter-Twist Belt, 665
Drop, The, in Multiple Expansion Engines (Weighton's tests), 337
Dry Secondary Cells for Electrical purposes, 673
Duplex Milling Attachment, 202
Dust Destructors (*see also* Refuse Destruction) and the Utilisation of their Heat, (Ed.), 480, *see also* 120 *and* 240
Dyeing Machine for yarns in Cop form, a New, 450
Dynamometer, A New Friction, 449

EASTERN Steamship Lines, British, purchased by Germany, 211
Economy of Heating Feed-Water for Locomotives, 452

Vertical High Speed Gas Engine, New, 61
Vickers Patent, The, (Ed.), 478
Vickers-Maxim 37 mm. guns sent to South Africa, 244
Victorium, a new Metal, 236
Vienna, Electric Lighting and Traction Scheme for, 570
Violet Scent, 570
Viper, H. M. Torpedo-Boat Destoyer, 242, 428
— speed attained by, 211, 335
Volga river, Russia, Belgian Electrically-operated Dredge for, 83

WAGGONS, military armoured, 71
War, Automobiles in, (in the French Army), 206
— Machine, The Balloon as a, H. L. Swinburne, 259
— Road Locomotive (*see* Traction Engines), 323
— The, and the Empire's Trade, 230
Warfare, and Invention, 593
— Modern, The Effect of Recent Inventions on, 5
— under Water, 355
Warships (*see* Naval and Marine Engineering), Coaling of, under Steam, 86
Waste Products from Cake Ovens, Utilisation of, in U.S.A., 81
— of Water in London, 237
Water Cooling or Condensation, 433
— Filtration, (*see* Filters), in Russia, 446
— Gas, Carburetted, S. Cutler, Jnr., 377
— — Process, New 679
— Meters, 237
— Pipes, The Plumber's Latest Claim, (Ed.), 602
— Power for Electrical purposes, *see* Niagara Falls
— Purification, (*see also* Sea Water), the Reeves Filter, — 571
— Scheme, The Coolgardie Goldfields, 555.
— Supply, London, 474
— waste of, in London, 237
Water-Tube Boilers (*see* Belleville Boilers), Cost of Steam-raising in, 652
Waterways, *see* Canals, Scheldt, *etc.*
Waterworks (*see* Nile Engineering Works)
— Projects in Madeira, 670
Weaving, Improvements in, 656
Wedgepieces, *see* Planing
Weight, Increasing, of Locomotive Engines, 447.
Welding, Electric, of Rail Joints, U.S.A., 83
Well-drilling Machinery and Pumps required in Syria, 670
Well-Pump, Gas-driven, 201
Welsbach Incandescent Light Co., result of its legal action, 244
— — Gas Mantle, The, 679
Westinghouse 2000 h.p. Steam Turbine, 335
Wheel and Motor, Self-contained, for Propelling Vehicles, 334
White Ants, means of rendering wood proof against, needed (A Badly Wanted Invention), 89
Wilson, W. H., Pattern-Making and Moulding : Their Position in the Engineering Shop, 444
Wire, Aluminium, for Electric work, tests of U.S.A., 209
Wireless Telegraphy, 235
— — developments of, in the U.S.A., 208
Wood (*see* Fir) to render proof against White Ants (A Badly Wanted Invention), 89
— Fire-Proof, in Shipbuilding, (Ed.), 122
Wood-Working Machine, New, 105, 548
Woollen Goods for Palestine, 678
Workshop Heating, 213
Workshop Practice,
Alloys for Brassfounders, 333
Beam-Engine Cylinder-joint, a large, Remaking, 443
Black, To Produce a Brilliant or Dead, on Brass-work, 666
Boiler Shop Kink, A, 79
Brass or Copper Pipes, Simple Device for Bending, 567
Centering Cylinders for Tracing and Turning, 201
Concentric Turning Rest, 668
Drilling Machine Attachment, a Handy, 669

Workshop Practice—*continued.*
Drilling Machine Jig, a Handy, 667
Driving a Planer with a Quarter Twist Belt, 665
Duplex Milling Attachment, 202
Lathe, A, Adapting for Planer Work, 442
Lathe-Chuck, A Useful, 441
Lathe Headstock, Repairs to a, 565
Long-Twist Drills, 564
Making the Most of a Screw-Cutting Lathe, 331
Old Iron Piping for Trueing a Grindstone, 669
Parallel Reamering Machine, 331
Piston-Rod Roller, A, 202
Planer Job, A, Automatic Feed by a String, 80
Planing Angles or Wedgepieces, An Easy Method of 566
Saw-Draughting, 440
Screw-cutting Gauge, 666
Simple Jigs for forming Spheres, 441
Steel Tools, Notes on Hardening and Tempering, 567
Taper Boring Rig, 78
Tie-Spotting or Grooving Machine, 78
Troublesome Nuts, 564
Unique Jig, 200
Ventilation, Improvement in, 565

X RAYS, Results of Research on, 234

YEAR, A Great Industrial (1899), (Ed.), 123

ZINC TRUST, A Threatened, 93.

WORLD'S INDUSTRIAL PRESS,
Architecture and Building :
Construction and Design, 95, 214, 340, 456, 576, 683
Heating and Ventilation, 214, 340, 576, 683
Plumbing and Gas-fitting, 214, 576, 683
Miscellaneous, 95, 214, 456, 576, 683
Civil Engineering :
Bridges, 95, 215, 340, 456, 576, 683
Canals, Rivers and Harbours, 95, 215, 340, 456, 577, 684
Irrigation, 95, 456
Miscellaneous, 95, 215, 456, 684
Electrical Engineering :
Electro-Chemistry, 95, 216, 340, 456, 577, 684
Electric Lighting, 96, 216, 340, 457, 577, 684
Power, 96, 217, 341, 457, 578, 685
Telegraphy and Telephony, 97, 218, 342, 458, 579, 686
Miscellaneous, 97, 218, 343, 458, 579, 686
Marine Engineering and Shipbuilding, 98, 219, 343, 459, 580, 687
Mechanical Engineering :
Boilers, Furnaces, Fuel, 99, 220, 343, 459, 580, 688
Compressed Air, 99, 220, 343, 460, 580,
Engines and Motors, 99, 220, 344, 460, 580, 688
Power and Transmission, 100, 221, 345, 581, 689
Machine Works, Shop and Foundry, 100, 222, 345, 460' 690
Refrigeration and Cold Storage, 690
Miscellaneous, 101, 222, 345, 581, 690
Mining and Metallurgy :
Coal and Coke, 101, 223, 345, 582, 690
Copper, 102, 223, 583, 691
Gold, Silver and Diamonds, 102, 223, 346, 583, 691
Iron and Steel, 102, 224, 346, 583, 691
Mining, 102, 225, 346, 583, 001
Miscellaneous, 102, 225, 347, 691
Municipal Engineering :
Gas Supply, 102, 226, 347, 583, 692
Sewerage, 103, 227, 347, 583, 692
Streets and Pavement, 104, 227, 347, 583, 692
Water Supply, 104, 227, 347, 583, 693
Miscellaneous, 104, 227, 584, 693
Naval and Military Engineering, 104, 347, 584, 694
Railway Work ;
Motive Power and Equipment, 584, 694
New Projects, 105
Permanent-way and Fixtures, 105, 585, 695
Transportation and Conducting, 106, 585
Miscellaneous, 106, 585, 695
Street and Electric Railways (Tramways), 106, 585, 695
Trade and Economics :
Commerce and Trade, 106, 585
Currency and Finance
Governmental Control,
Labour, 585
Miscellaneous, 106

SPECIAL SUPPLEMENTS (PLATES) VOL. II.

Samuel Rideal, D.Sc. Lond., F.I.C., *facing* p. 15.

James Swinburne, M.I.C.E., M.I.Mech.E., etc., *facing* p. 125.

New Express Passenger Engine, North Eastern Railway, designed by Mr. Wilson Worsdell, *facing* p. 315.

Japanese Imperial Navy Torpedo-Boat Destroyer *Usugomo;* builders, J. I. Thornycroft and Co., Chiswick, *facing* p. 427.

Triple-Expansion Engines of the s.s. *Manchester Corporation* and *Manchester Commerce*, built by Sir Christopher Furness, Westgarth and Co., Ltd., *facing* p. 543.

The Japanese Battleship *Asahi*, built by Messrs. John Brown and Co., Ltd., Clydebank, *facing* p. 603.
